World Environment Day [5th June, 2021]

On the occasion of World Environment Day (2021), students volunteered in the cleaning of Bhukhi Stream and took out a large volume of waste from the stream. The waste was dried and was segregated into degradable and non-degradable waste. Students also participated in mega plantation drive organized by Botanical Garden along with our department. Students volunteered in plantation of 10000 saplings across the university campus. Bhukhi Catchment Area was declared as Ecological Experimental Site by Honarble Vice Chancellor in gracious presence of Rajmata. This site will be used for different ecological experiments by students of different departments.
