GENERAL INFORMATION

☐ INTRODUCTION

Guidance and counselling is an integral part of living. It comes naturally to us to seek guidance at a crossroad in an unfamiliar place. We face many such unfamiliar crossroads in our journey through life at all ages. This is particularly so in a world that is constantly in change. We cannot take shelter in our traditional beliefs and practices in today's world. For our ways of living, working, and relating all have undergone a sea change. Add to this the pulls and pressures of a fast moving and competitive society that we live in today. The result of all these on the average individual is in confusion, helplessness, stress and coping out. Even our school-going children are not spared of such negative consequences. All these speak for the need for guidance and counselling services made available to our people to help them strengthen their coping and actualizing resources. But there are far too few such services and trained professional counselors available for our people to turn to.

THE DEPARTMENT OF EDUCATION (Center of Advanced Study in Education-CASE)

The Department of Education is one of the three departments under the Faculty of Education and Psychology, The Maharaja Sayajirao University of Baroda; the other two departments are the Department of Educational Administration and the Department of Psychology. At the time of establishment of the Maharaja Sayajirao University of Baroda 1949, the existing Secondary Teachers Training college of Baroda was continued as the Department of Education. Ever since its inception the Department has been in the forefront in the field of Teacher Education in the country. In recognition of its excellent contributions in the areas of teaching, research and extension the Department was raised to the status of the Centre of Advanced Study in Education- CASE, by the University Grants Commission in 1963-64.

The Department of Education, Faculty of Education and Psychology, The Maharaja Sayajirao University of Baroda, is conducting a one- year part time programme, the Postgraduate Diploma in Guidance and Counselling (PGDGC), from the academic year 2001-2002, with the purpose of meeting the requirements of trained personnel in guidance and Counselling. The PGDGC Programme is sufficiently generic in kind and it prepares its candidates to work

as frontline counselors and mental health professionals in a wide variety of settings. However, at a time when guidance and counselling is being integrated into the school and college systems across the globe, the personnel trained through the PGDGC course will be an asset to educational institutions.
